(Letter to Dr. J. J. Brownson)
(typewritten)

Oct. 30th, 1896.

BALTIMORE

Dear Doctor:-

I am glad to find an enthusiast on emphema, a disease which is more neglected, and kills more people than any other disorder of the chest, but please do not wait until you get oedema and tenderness before operation. I think your results are certainly excellent.

Many thanks for the paper.

Sincerely Yours

WM. OSLER.
