(Dr. W. S. Thayer)
Canton Aug. 28th 1897

Dear Thayer

Julius Thayer family

I hope you have had a jolly & profitable time. We saw in the cable dispatches that you had been presented to the Czar at Petershof. I write to catch you in London. Draw on me the National Union Bank of Baltimore for the \$200. I have arranged it. You will need it I am sure. Everything seems smooth at the J.H.H. Camac is engaged to Miss Medcalfe & leaves in Oct. This will put Merae in his place - lucky we have so good a man. MacCallum has a great find in the crows blood - conjugation of ^{organisms} ~~organisms~~ - the flagella penetrating definitely certain bodies which undergo changes etc. It seems quite straight & will of course be most important. His paper was very well received. Lister moved the vote of thanks & spoke most appreciatively of the work.

We have been at St. Andrews, delightful spot. I go to Montreal for the meeting & then on the 4th to Baltimore. Mrs. Osler & Ike are very well & send love. Poor Laffie has had for six weeks an abscess of the jaw & has been in the surgeons hand three times.

Safley,
Bar Harbor (3)

Yours sincerely
Wm Osler
