(Letter to Dr. Courtney)
(typewritten)

Jan. 31st, 1898.

BALTIMORE

Dear Dr. Courtney:-

Your paper interests me very much, particularly the point of the abolition of the knee jerk in these fracture cases. I have been talking over this point with Drs. Thomas and Cushing in a case which they are studying very carefully at the hospital. I wish you would send Dr. Thomas a copy of your paper. His address is 1228 Madison Avenue. The point is really one worthy of additional study.

Sincerely Yours,

WM OSLER

P. S. Since writing this I have just got your note and the enclosure. Many thanks. I was looking up the question only with a view to adding an additional note in the next edition of my text-book. Much obliged for the addition reference.
