

(1898 or '99?)

W.O., to J. George Adami.  
R.M.S. "Campania".

Dear Adami,

Your paper went off very well (~~Edinburgh Meeting, B.M.A.~~) good audience. No discussion. I think it rather paralysed them. The demonstration was well attended and N.\* had two microscopes on the Museum every day, so that the subject was thoroughly brought before the men.

I shall be glad to hear of any further developments. We had a delightful meeting.

Love to 'little Mary Cantlie' and the microbe.

Sincerely yours,  
Wm. Osler.

J.G.A. \* Nicholson - one of my students who went over to demonstrate my slides.
