Dear H. V. O.

The Shakespeare is most acceptable. I had looked over the article in the *Dt.* of National Biography with much interest.

I am very fat & well - 152 lbs, my maximum weight.

The "organism" in cirrhosis is a peculiar modification of the colon bacillus. A. is working at it - most interesting, but I doubt if it can remove the reproach from the whiskey.

I have just returned from Richmond & am off to Toronto in the morning for a few days.

Yours ever with N. Y. greetings to the family.

Wm. Osler.

Mrs. Osler says "your room is ready". Do come this spring, or indeed when you can.
