

W.O. must also have been asked to apply.

1 West Franklin Street.

W.O., to J. George Adami.
1.4.'98/99

Dear Adami: I am so grieved to hear of Kanthack's death - it is a grievous loss to all of us. Poor fellow! and he had so much to live for and so much to do.

I am so glad to have such good news of 'little Mary Cantlie'. Surely a slight lesion as you describe should heal completely and she should be as well as ever. Had the mental depression anything to do with lactation? Why should she not live in England? By the Spring she will be all right, and with a judicious plan of life the climate could be borne. It seems a pity to miss such an opportunity. I am 'out of the question'.

Love and best wishes to little Mary C.

Yours sincerely,
Wm. Osler.

* Re the invitation that had come to me to apply for the Chair of Pathology at Cambridge. My wife had a small area of dulness at either apex.

Would you write send a short
Article editorial note to the Phila. Med.
Jr. about him. If you sent it
