1 West Franklin St.

Dear Camac:

So glad to hear from you. I am sure the Clin. Microscopy work will tell. It is most attractive for the students and young doctors. So glad of the gall-bladder article. It will do too for our third Typhoid studies at which I am at last at work. I have been much driven this winter - so much on hand and so many calls. By the way look our for the mild cases of trichonosis at Bellevue - The eosinophilia is most remarkable. Thayer has just found a 6th case in a nurse in town. It is really a very good blood find. You remember one of the cases when you were here. The associate Professor is doing so well - a good many calls out of town. We still miss you & your good system. The new school I hope will make progress. Schuman was here a few weeks ago - full of hope & plans. Mrs. O & Ike are well - I hope to see you at an early date. I have only passed thro N. Y. in my past three visits.

Kind regards to your wife & to Dr. Metcalf. Mrs. Osler sends love.

Yours ever

WM OSLER
