

Mar 1899

It has been seen that in this last year's work had established the habit of journal and it was near the
that he should send a paper read. Year later in one of his lectures ~~at which~~ the
Molecular Biology of Microbes which was the first he found the first bulletin to Boone for 15
months or more substantiated.

Microbes

It is hard to find seen the trichinae under the microscope; he recognized them in
the muscles of dissecting room cadavers; it aroused an interest in parasites in general and
he began to make lists of them in other as well as in other vertebrates: ~~the~~ ^{assembled} ~~organized~~ ~~all~~
what he encountered

~~possible~~ ~~to~~ ~~be~~ ~~experimented~~ ~~upon~~ ~~the~~ ~~transmission~~ ~~of~~ ~~the~~ ~~disease~~ he instituted feeding experiments to
determine the transmission of the disease to other animals; disassembled all possible
the resources of journal for these purposes; he finally wrote an important paper on
the subject, described cases to the public health department; one of his students of year
before of the frequency of this disease in man and

taken Dr. Sherrin into his clinic the important diagnostic changes in the blood
which made a diagnosis possible even without recurrence ^{a piece of} muscle for examination. Thus

do some things for.

CU5417/95.29

Admissions
November 27, 1920.

Name	Admission Diagnosis	Ward	Service
Katie Beveres	Carcinoma of Breast	Dm	Surgical
Mary Looney	Neurological Obs.	Dm	Neurological
Frank Eddy	Medical Obs.	Fm	Medical
Benjamin Hutchinson	Surg. Obs.	As	Surgical
Richard Zeigler	Lues	Fm	Medical
Otto Ceviate	Lues	Fm	Medical
Antonio Boni	Lues	Fm	Medical
Louis Seymour	Lues	Fm	Medical
Rufus Simmonds	Dysentery (probably tropical)	Fs	Medical
Eugenia Cologiendo	?Cerebro-spinal Meningitis	Em	Medical
November 28, 1920.			
Coucetta Bouciforte	Pleurisy c Effusion	Em	Medical
Gertrude Martin	Lues	Em	Medical
Maurice Davidow	Acute Appendix	Cm	Surgical
Jeanette Miller	Acute Appendix	Dm	Surgical
Kathryn Evans	Med. Obs.	Am	Medical
Leonard Ware	Urological Obs.	Am	Urological
