P Q.

5th 1902?

Dear Herbert

I do not think there should be any difficulty about your insurance. The case was a very exceptional one & not without some doubt as to the tuberculous nature of the laryngitis. Delevan I believe thinks it more likely to have been some mycotic lesion. You never had any signs of pulmonary trouble. I saw them all at Dundas last week - We are here for the summer & like the place very much. So glad to hear that you are going to have your own parish. You need plenty of exercise & as you say check the tendency to over load the furnaces

Yours sincerely

W^m Osler
