Baltimore, November 24, 1903

Dear McCrae:

I have had to give up the Lea proposal. I have got to my limit so far as work is concerned. The last few weeks have shown me how useless it would be to attempt any additional responsibilities. I am awfully sorry as we could have made a good System together. I think we can arrange for you so as to keep you here. The work in Therapeutics could be made a special Lectureship, and I will try to arrange the matter of salary. There would be plenty of work to do.

Sincerely yours,

Wm. Osler.

This was in reference to the first  
purpose for the System - which  
he declined.  
Written, not announced verbally.
