Dear Dr. Abbott:-

I thought you would get something out of the demonstration notes. Any specimens you see illustrating particularly syphilitic aortitis that would photograph well I should like to have. Are there any specimens of arterio-venous aneurisms? I will let you know of any special reference I find to the general subject.

I am so glad to hear that they have given you the Fellowship in Pathology. We are getting settled here, and I think I shall like it very much.

(Signed) Wm. Osler.

P.S.- Are there any specimens of mycotic aneurisms in the Hospital? I will ask Dr. Libman to send you his paper. I could not find our specimen.
