

Dr. C. P. Howard.

Dear Campbell:-

CUS417/103.23
7 Norham Gardens, Oxford.
Aug. 13th, 1905.

Thanks for the photographs among which I found Smith's. Ridges' bill is rather steep, but it will help to pay his expenses. I wish you would ask Dr. Bloodgood about the photographs and notes of two cases of abdominal tumors in cryptorchids. I think there were photographs of them both. One was on our side. I am sure you must have had a busy summer. Marjory was here the day before yesterday, looking very well. She goes to Scotland next week to stay with Jered and then joins us. She will probably stay over until December and return with us. In many ways it would be much better. We are, of course, delighted to have her, and she and Miss 'Nichols' will look after the Rhodes scholars this winter. Tommy hopes to catch some trout at Beaulieu.

Sincerely yours,

W. Osler.
