No. 74
(Letter to Dr. C.N.B. Camac)
(typewritten)

November 18th, 1905

7, NORHAM GARDENS,
OXFORD.

Dear Camac:-

(Counsel & Ideals)

An advance copy of the book, reached Mrs. Osler yesterday. It is splendid, and we all feel so deeply indebted to you for it. I am sure it will prove a great success. I think it should be electrotyped. There is certain to be a demand for more than fifteen hundred copies. To electrotype it now would cost very little, not a tenth of what it would be to set the type again. Mr. Hart says he would keep the type up until Christmas. I am delighted to hear that Mrs. Camac is better. I have ordered a handsomely bound copy of the little book for her. I am glad to hear that Brannam will introduce clinical clerks in the municipal hospitals. Well arranged, it would prove the most important advance in medical education ever made in New York.

Sincerely Yours

WM. OSLER
