

Attempt at consolidation under one act, under names of Union & Chapter 1905  
Not accepted more by the Medical Council justified by his own balance

The Royal Med Soc & Chyrurg Soc long time the intention being in the year out nearly a matter of

No further Sir P. Douglas Powell spoke of benefits of union of all into one Royal Socy of Medicine  
Some practical consolidation desirable. Goods all, Modern Medicine Society, Holmes & W.H. Allchin all in form.  
Miscellaneous not mentioned.

Function to be proposed in sections - amalgamation of funds of different Societies.

Old Societies for objects to meet on incorporation

At discussion dinner of Med. Soc. of London Sir Wm. S. Church spoke in favour of desirability & special  
Chances of the various component bodies.

in  
Council of W.S. Church.

A meeting was held Apr 10 at Royal Coll of Phys. (Council favorable) to discuss the  
amalgamation of Royal Socy & Academy of Med. 1200 in all votes  
fusion without loss of identity

Proposed to meet the Societies this met at 20 Hanover Square & 11 Charles St.

11  
Sutton June 1773

The Med. Socy and the Med & Chyr. Soc were at two & as considerable paper of  
Committee of representatives the speaker

Report of the Socy. Comm. to the Comm<sup>ee</sup> - unpassed July 19 also a process

- Sirue Church
- Powell
- W. Wood
- Layden
- Fordyce
- Mullins
- Symonds

to be submitted to the Societies

Med Soc. to have all the  
splendid library & books  
highly esteemed & respect being  
received of Hanover Square

Nov. 23 Spent with of Med. Chir. Soc. to discuss above report - P. Douglas Powell's clause (in detail)  
Chir. Soc. of London della difficult that business proposed, Adams &

Edmund Owen should believe the speaker Nov. 27

Dec. 19th of 1844 the members of the Royal Med. Socy (no votes were?)

the arrangement of the Royal Med. Socy

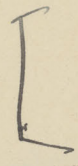

function into the Council, Jan 30 1844 Dec 30 1844

Oct 13

and speaking of dental erosion <sup>what was done was to measure</sup> by <sup>Hurst et al</sup>  
 at the B.M.A. meeting last year had a by discussion about teeth <sup>no further to be done</sup>  
 On Oct 13 he distributed the paper <sup>to the</sup> <sup>British</sup> <sup>Medical</sup> <sup>Society</sup> <sup>of</sup> <sup>London</sup> a school  
 which had only 33 students which was the only medical <sup>thing</sup> <sup>there</sup>. How this became known  
 to myself & me than that he had along the shoulders of the subject of their teeth of  
 English dentistry a nation and the a new member <sup>he</sup> <sup>at</sup> <sup>the</sup> <sup>use</sup> <sup>of</sup> <sup>power</sup>. <sup>He</sup> <sup>told</sup> <sup>some</sup>  
 Hans <sup>Smith</sup> that it was  
 to the joy men before him when dent it was "to convert the enormous percentage  
 of bad teeth and make chewers of them" and "to prevent the spread of dental - class lines of  
 the mouth of the teeth of the throat" <sup>and</sup> <sup>met</sup> <sup>3000</sup> <sup>for</sup> <sup>economic</sup> <sup>reasons</sup>. <sup>and</sup> <sup>that</sup> <sup>was</sup> <sup>the</sup> <sup>main</sup> <sup>reason</sup> <sup>about</sup>  
 routine inspection of the mouth of school children all of which was made  
 the subject of a longy edition in the Journal which admitted that "in the land upon  
 which he has so recently turned his face the widespread calamity has some attention  
 to the teeth that in this country - on the question Professor Osler remarks is  
 somewhat one or he makes the remarkable statement that if he were asked to say  
 whether some physical deterioration was produced by alcohol or by defective teeth  
 he should not hesitate to say "defective teeth". And there was days long before  
 arthritis and other <sup>of</sup> <sup>various</sup> <sup>sorts</sup> <sup>were</sup> <sup>actually</sup> <sup>traced</sup> <sup>to</sup> <sup>dental</sup> <sup>disorders</sup>.  
<sup>were</sup> <sup>under</sup> <sup>inspection</sup> <sup>of</sup> <sup>being</sup> <sup>done</sup>

They were still house hunting and on Oct 17th ~~at~~ his wife writes to  
 Thomas McCane

The form was written by the committee of enquiry and I was  
 recommended to write for the committee on 15-17 1905  
 further (see page) five others and a technical programme was  
 then the very success of the survey was  
 which was the first of the kind in the history of the  
 and the form of the survey was the first of the kind in the history of the  
 which physics and the mechanical survey is demanded.
