Dr. C. P. Howard.

Dear Campbell:-

How is the battle progressing with you? I hope you are settling down to a good steady swing of work. I wish you would ask if there are any published plates suitable for instruction in clinical diagnosis - plates similar to those in Sahli's work. Did I not see some in Mueller's clinic? I promised to ask about them for one of the Manchester teachers.

Ike and the family very well,
Sincerely yours,
W. Osler.
