~~the presence of the volume~~ we have made a rough calculation that there are 650 examples of the quotatio recta in the less than 400 small octavo pages of good sized type; while as for the examples of the quotatio obliqua - the "tags" and reminiscences of Browning among wide loose books, the words and phrases that in a flash bring to mind the wisps of great men, and what our fathers in literature have declared unto us - their names in legend; they are not to be counted.
