Oxford.

Dear Shattuck

We have had George Cheyne with us for a few days, among a bevy of girls and seeing the sights - the races between the college boats. It has been a glorious week and I think he has enjoyed himself. His chum Fischel has been here for a couple of days & we have had a merry party. Dic. Cabot comes on Saturday. G. C. seems greatly interested in medicine & should do well. I have given him notes to some of the younger men with whom he will see the hospitals. Poor Pye-Smith is hard hit - Parkinson's disease without the shakes. He spent a week-end with us last month & it was quite sad to see the change. Do come over before long. There is much here that would interest you. If George comes over this year tell him to come here from the steamer.

Yours ever

Wm Osler
