Dear Mac

Has anything been done about a phy- or Path- Chair in Chemistry? I had a letter the other day from a man asking if such a position was to be established and on what lines. Could you let me know. Mann from here goes to Tulane I hope that all goes well & that the School flourishes. I hope to be out in September I am struggling with that System of Medicine with McCrae. 'Tis lucky I had him to bear the brunt of the work or I should have been confined by this time.

Greetings to MacKenzie & Wright & others

Sincerely yours

W^m Osler
