(Card to Dr. Thomas)

5 I do not believe Brauns monograph deals with larvæ of this kind - only with ^{helminthes.} Shipley would know of ^{cases} my references. I looked up the literature of ^{larvæ} ~~diptera~~ in man a few years ago for my text book but ^{as} far as I remember there was no case in the eye. The day when you read your paper go over the ~~Index~~ catalogue & the ~~Index~~ ^{US} medicines at the library. Ask for Mr. Hewlett & say you are a friend of mine. I am off to the continental cliniques for six mos. Greetings to Mrs. Thomas

Yours

W OSLER

diptera(?)

Send me your paper when ^{published.} finished-
