May 1st, 1908

Dear Mr. Bixby:-

The Hamilton book gave me a great deal of pleasure. I read it last evening until quite late. What an interesting character he must have been! It is really a remarkable picture which he gives of the period. The book is a great pleasure to handle and to look at. It is most beautifully printed and such splendid paper.

I hope if you come to England you will give me the pleasure of a visit. I have heard of your great interest in books, so that we would have much of interest in common.

If you have not already done so, it would be a most gracious thing to send a copy to the library of the Medical Chirurgical Faculty of the State of Maryland, 847 N. Eutaw St., Baltimore, of which Upton Scott was the founder. In the recently issued annals there is a good deal about Alexander Hamilton - not more though than you have got.

Very truly yours,

(Signed) WM. OSLER
