Dear Knopf

No compromise! Fight it out & we will try & rouse the profession to pay your expenses. I am willing to subscribe \$100. and to write a strong letter to the Journal of the Association urging the active cooperation of all interested in fair play. You have been outrageously treated and any decent judge would give you large damages.

After Welsh's letter of the 7th no opposing evidence that he could give in the states would be worth a rap.

Get it into court as soon as possible - You have a straight case, and the profession should to a man, stand behind you. After all you have done to stimulate public interest in the tuberculosis campaign it is a damned shame that such a worry should come to interfere with your work.

Sincerely

Wm. Osler.
