

13, Norham Gardens, Oxford.

Jan. 3rd. 10.

Dear Pratt,

I could not possibly come next spring. I did not think the Congress was so near. We hope to come out in the late summer. I felt sure you had made no mistake, it is most satisfactory to have your letter.

What a remarkable case of B.coli infection! I have never seen anything like it.

We have had a very busy Christmas. I have got to work up my Angina Pectoris material for the Lettstonian lectures at the Royal College of Physicians in the spring.

With love to Rosamond.

Ever Yours,

W^m Osler

*In reading accounts on cholera by Francis Clifton M.D. in the
Journal of Physical Medicine, probably some other
lectures up in the D.N.B. in his return.*
