Dear Dr Cushing,

I only received your letter after you had left Norham Gardens.

Every year I organize a course of lectures on Greek subjects outside the regular course - Greek Medicine, Greek Astronomy, Greek Mathematics, the Art of Excavation, and the like in which I invite specialists to come and lecture. Sir William Osler was always interested in this course and helped me more than once.

I am afraid I have no letter from him of any interest. We met so easily that there was no need to write.

Yours very sincerely,
Gilbert Murray.
