May 5th, 1911.

Dear Mac:-

In reply to your queries:-BRILL'S DISEASE should go in with a separate section after TYPHUS and MEXICAN TYPHUS. Will you take it? PELLAGRA I will take and rewrite.

COLON INFECTION, special section, I will take.

PNEUMOCOCCUS INFECTIONS, I will take, and PNEUMONIA will go under it.

POLIOMYELITIS, with the infections, I will take.

DISEASES OF INTERNAL SECRETION, a special section, I will take and rearrange.

TYPHOID, you take, new charts altogether, knock it to pieces, revise, rewrite, cut up, do anything.

CHRONIC RHEUMATISM arrange as you wish, at present it is a sort of clinical dust-heap.

It would be delightful if you could get over about the end of September. I don't think there would be any difficulty in getting passages back if you arrange early. Can we do anything about it for you?

Miss Abbott is all right again, she had a nasty looking phlebitis.

So sorry to hear that Barker is still in bed.

I hear you are having a great time in settling the question of all-time clinical men; I am afraid it is a Utopian scheme. I do not see how you can ever keep the public away when once a man has a strong reputation. It would be a great thing for you young chaps, as you would get all the consulting work and all the kudos, and in a big clinic like the J.H. the chances are that in 10 years the head of the department might be the smallest man in the eyes of the community and the profession, of the whole group.

I am interested again in ANOREXIA NERVOSA. I have seen a couple of good cases lately. Had we not two deaths? I wish you could get somebody to look them up. Do you remember a quite young child, a marked example of it?

Nona got over last week, she is in first rate condition. Love to Amy.

Sincerely yours,

Wm. Osler.
