

Summer Term, 1911.

In the summer term of 1911 he gave a course of four lectures for the benefit of the Indian Service probationers and to the Forestry students, on "Life in the Tropics for Europeans": -

- 1) General rules of health; 2) Malaria; 3) Plague and cholera;
- 4) Dysentery and the less common diseases - parasites, snake-bite, etc.

Cf. University (Oxford) Gazette, for 1912; extract from Annual Report of the Curators of the Indian Institute, 1911.
