

From the Regius Professor of Medicine, Oxford.

James Osler
CUS417/113.65

21st May, 1912.

Dear Tyson,

Yes. I am sure I acknowledged the receipt of your textbook, for I looked it over with great interest and found several things of use in the preparation of my new edition.

Revere was delighted with the fishing book, and I think he wrote to you.

I am awfully sorry to give up my active membership of our old association, but I have not been able to be present for three years, and I suppose every vacancy is of importance. What a success it has been! You really took the initiative in the organization.

Revere is all right again. We are having, as usual, a very busy summer.

Sincerely yours,

(signed) Wm. Osler.
