Oxford.

July 11th, 1911.

Dear Garrison:

I am so distressed to hear that Fletcher is laid up with diphtheria. What is he doing with such a disease at his time of life? It is disgraceful! Please give him my love.

Amid the many letters of congratulation none was more gratifying to Mrs. Osler and myself than that which came from the Army Medical Museum.

Many thanks for your paper just received.

Sincerely yours,

Wm. Osler.
