

October 15, 1912.

From Oxford.

Dear Libman:

The meeting is in the first week in August. You could read your paper in the afternoon, and there are plenty of rooms at the Royal Medical Society, where we might have a good demonstration. That is particularly what we would like. What a remarkable condition you mention of carcinoma! I never met with it. Send me some time the title of your paper.

Sincerely yours,

*(Leukemia secondary to  
carcinoma)*
