

(Sir D'Arcy Power) ?

From the Regius Professor of Medicine, Oxford.

16th Dec., 1912.

Dear Power:

*Power. Values
of History*

I think we ought to determine what size the fasciculus should be. I should say a small quarto. The pictures could be reproduced in photograph I think quite well enough. You know the Oxford historical portraits which we have issued here. They are very satisfactory. In any case Nixon had better get the photographs done, and let him send me a memorandum.

Sincerely yours,

W^m Osler.
