

(Dr. C. F. Martin, Montreal)

FROM THE REGIUS PROFESSOR OF MEDICINE, OXFORD.

(typewritten)

20th. Jan., 1913.

Dear Martin:

It was very nice to have your letter, and all the news about the hospitals. I should think it would be a very good scheme to take over the one for private patients. It is sad to know that Shepherd is having a recurrence of those boils. It is curious in association with the eye trouble.- as if it might be one of those curious types of non-glycosuric diabetes.

I am so sorry to hear that Miss Charlton is in trouble. I can readily understand the difficulties of the situation, but, poor soul, she has really done a great deal for the School. I am sorry to hear of Alcock. I should like to have my Peyer's patches as well as the spleen removed, if I had leukaemia. I have just heard of poor Gibson's death - a sad loss.

We are all going on the panel, and the British Medical Association is safe!

Sincerely yours,

W^m Osler
(per J. C., Secretary)
