

No. 112
(Letter to Dr. C.N.B.Camac)
(typewritten)

25th July, 1913.

From the Regius Professor of Medicine, Oxford.

Dear Camac,

Thanks so much for your sketch of McClellan. It is sad that he should have been cut off so comparatively early. I remember him with great pleasure; he was always so kind to me.

I do hope Mrs. Camac is better. Grace has returned from Harrogate, and her wrists are much more supple. I think it is the gout, as she has had attacks of swelling in her big toe.

We are busy getting ready for the congress. I have a very heavy job as President of the Medical Section. There will be a number of nice men here: I wish you could have come. T. McCrae and his wife have just left us after a short visit. Willie McCallum has been here, and I expect young Shattuck for Sunday.

Do give my love to Mrs. Camac and the girls.

Sincerely yours,

WM.O.
