

From the Regius Professor of Medicine, Oxford.

27, Nov. 1913.

Dear Garrison,

I am very remiss in replying to yours of October 12th. I have sent on your paper to Crawford and asked if he could find a place for it in our programme this winter. It is a very interesting document relating to the 'King's Evil' and should certainly be published. Crawford, I am sure, will be keen about it.

*Annamasse/*  
The Historical Section at the Congress was a great success and has been a stimulus to work. I have been so busy with one thing and another that I have not had time yet to finish the correction of the proofs of my Yale Lectures. Anarnese/is, I believe, near Geneva. I will find out exactly from Dr. Klebs. I am awfully sorry that McCaw is leaving. Do give him my warmest regards.

Sincerely yours,

Wm. Osler.
