(To Leonard Mackall)

FROM THE REGIUS PROFESSOR OF MEDICINE, OXFORD

15 Jan., 1914.

Dear Mackall:

What an angel you are to send these books! I am particularly delighted to have the Library Catalogue of Chalon, which looks uncommonly good. The Nouveaux Mémoires are most interesting; I am very glad to have the set. Also the Naudaeana.

I am struggling with my paper for the Bibliographical Society, on the early printed medical books. I got the Beringer - a splendid copy, and very reasonable!

I am sending you a little Yale lecture [A Way of Life] which may amuse you and a perfect little gem of an edition of the Praise of Folly, which Mrs. Allen has edited at my request for the Press.

Sincerely yours,

W^m Osler.
