

Dr. Donald Armour.

Feb. 4, 1914.

Dear Armour,

I have been inundated with ghastly
correspondence from that poor ~~Woman~~ woman.

As I told you I went down there &
found an appalling condition. I have seen
Spott several times since & we have
put her in charge of a very good
man, Dr. Wallis of Old Crinstead, but

he says she has been drinking like a fiend
& evidently in a bad way. Wallis says

she is not certifiable, so what are we

to do! I have written to her brother
urging him to come over & take her out
of the country. These ancient canophilic

vestals should be segregated by Act of
Parliament. The Gov^t should buy

Iceland from Denmark & deport them

there automatically at the ~~same~~ menapause.

Love to the family
