Ir.C.P.Howard

Dear Campbell:

I am very interested in your bronchiectasy paper in this months American Journal. It seems to me that the disease has increased very much late of late. I have seen a good many cases over here and atpresent have a remarkable one under observation which has lasted some 15 yrs.

I hope all goes well with otilie and the babies. I heard from marion the other day and she was better. I expect now she will make a repid recovery.

Sincerely yours,

W. O.
