(Maude)  
Dear Dr. Abbott,

I am delighted to hear about that new malady, which ~~which~~ you will have to call 'Abbott's Disease'. Please cut that article down as close as you can, as Dr. McCrae is a hard taskmaster, and the Leas still worse. I quite appreciate what Mackenzie says, but, of course, this is a system for general practitioners. Mr. Hart is getting on quickly now with the work.

I am off to Aberdeen this morning, and am sailing on September 5th. I will let you know when I am due in Montreal.

Sincerely yours,  
WM OSLER
