

C O P Y

From the Regius Professor of Medicine, Oxford.

26, October, 1914.

Dear Flexner,

It is awfully good of you to have helped in this matter of the poor Belgian professors. It is a tragic business, and the Rockefeller Foundation will solve the problem for a number of them. Denys is here with his family, and is at work with Dreyer. Van Genuchten is in Cambridge. These are the only two distinguished medical professors. Denys got away with enough to last him for about a year; van G. with precious little.

Love to the family all.

Sincerely yours,

(Signed) Wm. Osler.
