

RICHARD M. PEARCE  
2114 DELANCEY PLACE  
PHILADELPHIA, PA.  
(Copy)

From the Regius Professor of Medicine, Oxford.

6, November, 1914.

Dear Pearce,

That is a fine bundle of papers from the laboratory and most of them on topics so interesting to me.

It is nice to see Musser's name perpetuated in this way. Those vivisection papers of yours are A.1.

Love to all the Mussers. Hearty congratulations to you and all your colleagues, particularly to young J.H. and to Krumbhaar.

Sincerely yours,

Wm. Osler.
