

From the Regius Professor of Medicine, Oxford.

30, November, 1914.

Dear Garrison,

Again many thanks for the fine bundle of Ether papers. They are just what I want. Please give my general thanks to the Library.

I have not yet seen your review of Gaskell. I hope it has not come and been snowed in. I have at present a perfect avalanche of correspondence and do precious little else but write letters.

Sincerely yours,

Wm. Osler.
