

(From secretary's notebook)

CUS417/119.40

(To Col. Wilson, Army Med. Dept.,
Army Hospital, Shorncliffe)

Dear Col. Wilson:

January 26, 1915.

I hear you have some cases of cerebro-spinal meningitis at Shorncliffe. It is a disease in which I am very much interested, having seen a couple of epidemics in the United States. I have to come to the Canadian Hospital on Friday and if you have any cases in the camp I should like to come over and see them.

Wm. Osler.
