Dear W.S.

I hope you are all right again & that Sister Susan is better. It is too bad that you should have had to carved. Send us a line. I wish you could get over here for a trip - this country always sets you up. We are keeping cheerful in spite of the Russian set back To be as we are at the end of a year is more than could have been expected 2-1/2 millions in the field , the munition problem solved & the navy in control are three big items; but it will be a long affair. Germany is immensely powerful. France has done marvelously & is getting stronger & stronger. We are very busy & many people coming & going. Much interested in this camp ortrench nephritis so many cases. I had a p. in on Monday at cleveden-3rd week, diffuse neph. big anamic glistening white arteries- much-capsular champ. Difficult to say the cause- possibly throat as some cases have had tonsillitis. My library is booming, all sorts of nice new & old things. Eodler sent this a.m. 35 reprints of Listers papers & some of them his earliest; & I got this week Mansens original Mosquito paper. Revere is with the McGill unit as assit. quartermaster. The boy has developed splendidly; his whole heart is in books & literature, which of course is a delight to me. Love t Sister Susan.

Affectionately yours

W^m Osler
