

Dr. Wilbert C. Davison)
(copy)

[Nov. 2, 1916] 2nd
13, Norham Gardens,

Oxford.

Dear Davison,

So glad to hear that you & Penfield
are safely at work & like your plans.

We jog on as usual. Dr. Hertz of Guys
is here now in charge of the nerve cases &
a great help. I have taken him to *Taplow*
several times. We are much interested in the
local tetanus of which I have now seen
10 cases. H. is working at it. Typhoid has
gone - Hearts & Nerves the chief interest.
Reveres writes very cheerily ~~ly~~ from the
Somme - mud & mules appear to be his chief
interest. Dreyer is back. So glad you had
that *poliomyelitis* work. Get at the
standardizing problem as it is most im-
portant. I felt sure you would like the
school, in which there is a good spirit.
Love to all old friends - & greetings to
the light of your life.

Yours ever,
(signed) Wm. Osler
