

From the Regius Professor of Medicine, Oxford.

November 15th, 1916.

Dear Garrison:-

I kept an impression of the touch-piece to show Miss Farquhar, and it only goes this week. It is a beauty. Kleb's paper is A.1 and will be most useful. I must write to the good fellow for I am very fond of the non-teutonic side of him. It will be first rate if he can cover the whole field of Medical Incunabula, but it will be a heavy and long job. I shall look forward to the new edition with great interest.

Last night I attended at Penny Stratford, the 183rd Patronal Festival in honour of the Will[is] family, and talked about old Thomas, it was a most interesting occasion, and the "Poppers" popped at intervals through the day in honour of Thomas and his grandson, the famous antiquary. (i) /

Greetings to you all,

Sincerely yours,

Wm. Osler.
