Dear Sir

Shall be so glad to read your essay. I always enjoyed Isis so much. I hope for happier days when you may be able to continue it!

If the war is over next summer we shall have a short Seminar on the History of Science - Withington, Gunther, Shiller, Crawford and Singer will join. We have opened a special Library at the Bodleian for the History of Science. Dr & Mrs Singer are here - both very keen students. I will let you have our schema as soon as matured. Everything will depend on the war.

Sincerely yours

W<sup>m</sup> Osler
