

To Dr. Geo Dock - Revere, May 17, - Book

2 V 17

13, Norham Gardens,

Oxford

Dear Dock

Do let us hear about George. We should like so much to see him. if he returns via England, or if he gets a holiday. The American news has cheered us immensely. What a problem it must be for you in St. Louis. American troops will have to come, I am sure. Germany is still very strong. Revere has been in the thick of the Arras fighting more than a month of incessant moving as his battery was in the advance division. I hope with this hell he may get leave as he has been hard at it since he went over early in Oct. Did you ever send your Wesley paper? I cannot find one. Please let me have one as W. is an interesting character. The first edition of his Primitive Physic came in today from ^{by} Sothetz with a Paracelsus. My catalogue progresses but it is slow work. The Persian Embassy sent me a fine ^{3e} Rhagus Mss. arabic the other day. I expect it comes from my friend Sa'eed. 300 malaria cases sent here last month - all convalescent but they started a blackwater case with intensive quinine - fatal with anuria.

Yours,

W.O.
