Dear Blackader

What a suitable memorial  
to that splendid son! And it will be most  
useful. Instead of a subscription I shall send  
from time to time some of the old books on  
the subject which I pick up. I am sending  
a 1525 Vitruvius. I will let you know of  
anything special as there are at times collections  
which his friends might like to buy for the  
library. Love to Mrs Blackader. Yours ever  
W. Osler

Dear D<sup>r</sup> Cushing -

The enclosed letter was found by me this afternoon when looking over some old papers. Like my previous notes that I have it is not worth acknowledging. It is but an indication of his kindly & generous spirit - keep it or destroy it as you may see fit. I cannot use it and the memories it brings are very sad. The reference is to the Gordon Home Blackader Architectural Library that I have founded in connection with the McGill library -

Yours very sincerely

A. D. Blackader

I am aware it is too late for use  
even if it were valuable. -
