

Letter from W. O. to Dr. Adami.

Script.

13, Norham Gardens,
Oxford.

28. XII. 17.

Dear Adami,

So sorry you did not come back for tea, as I hear the G.'s ^{S?} were not at home.

I fear there is going to be trouble at Cardiff about the Mixing of the Path. and Preventive medicine. I find four letters just received that some of the good men had an idea that the two could be combined in the one man and one institute. I am sure this is a mistake. I enclose a draft (first) of what I have drawn up for the Prev. medicine. Would you (1) look it over carefully and add &c. and (2) put down a few strong headings for the Path. Institute of the Hospital as a separate affair.

Yours,

Wm. Osler.

P.S. Sunday. Isabel just gone looking so well. Please return this draft as soon as possible no hurry about the other.
