

From the Regius Professor of Medicine, Oxford.

18, V, 18.

Dear Garrison:

So glad to have the check list of your incunabula, for which Thank McCulloch. It is a fine collection and is a great credit to the library. My list of med. incunabula, to 1480, is now in the hands of Scholderer at the B. M. Polard would not print without a complete revision by an expert which is wise. I hope we shall print this October. I wish you were here for a few weeks to have your brain tapped. I need them badly. I am involved in a terrible job - a cat. raisonné of my library. The difficulty - to get the time and my regular Secretary away. I think you will be interested in my bibliotheca pirma in which I put the men who have made science etc. It is not easy to get everything - and yet harder to know enough. William J. Morton sent some of his father's early papers and the duplicates I gave to the R. S. Med. and made remarks about M. which may interest you.

↪ All goes well - and will go better. America has done nobly. We are so proud to see the nice boys who are in evidence now so much. I was at a splendid camp at Winchester last week. Singer is back from Sal^{on} Mike and with his wife have all sorts of schemes in hand - the biggest, the catalogue of all English scientific Mss. They are deep in Anglo-Saxon medicine.

Love to all,

Yours sincerely,

Wm. Osler.
