From Oxford.

Dear Libman:

So glad to hear that you are better. Take care of yourself. I saw Haft again last week. I am trying to get into touch with all the American Hospitals in England. They are getting very well organized and doing much good work. I shall look forward to your endocarditis papers. Many cases turn up in the soldiers. Lewis had six in one ward at Colchester at my last visit. All goes well here, and the splendid work of the U. S. is thrilling.

Ever yours,
