

New Park,

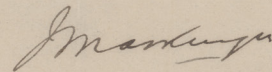

St. Andrews. 3rd Octr. 1918.

My Dear Osler,

I have heard from Dr. Christian, and he says that he would like the article upon Diseases of the Arteries, including Aneurysm, to extend to 50 pages of 450 words to the page. The other articles you mention we should be very glad to have, and you can write them to the extent that you feel justice can be done, as no one would ever accuse you of wasting words unnecessarily. I have not got your papers upon Angina Pectoris, and if you have any difficulty in sending them, if you will just give me the references I will hunt them up in the libraries.

With very kind regards,

Yours sincerely,

P.S.— The date which we would like your articles would be in about six months' time.
